

KIDS

FURNITURE

INTRODUCTION

DUGONG ADVENTURE hatched from the idea of bringing together educational knowledge and a joyful environment to kids. Today's kids spend most time playing with electronic products. Meanwhile, Parents are busy at work and once they have free time. There is no more communication between kids, parents and families. by integrating kids playgrounds into our lives, we are given a powerful tool to maintain contact with kids. both parents and kids together interacting, parents will know more about their kids and know how to inspire their ability. Kids feel more concern and love from their families. Such interaction is crucial for family education and a kid's character.

Kids are the future, and we do our best to bring joy to families by creating equipment that cultivates society, intellectual and physical growth. Keeping a happy and safe environment for kids is our original intention and determination.

Plastic Art Desk Chair Bed Series

Young children spend most of their time in bed every day. So the bed is good or bad. It has a direct impact on the healthy development of young children. Our factory has been guided by relevant medical experts. Combined with the characteristics of the preparation, a kind of engineering plastic imported from foreign countries has been successfully developed. production is stronger, has no opening design, and will not row hands. The bed board is made of original firwood. Refined from strips or firwood, it has good breathability and is an absolutely green and environmentally friendly product. The beds can be stacked on top of each other, which is convenient to receive and can bring greater activity space to the kindergarten. between.
